

SPRING & SUSPENSION SEATING INFORMATION:

Enduroflex™ Unit

- ◆ **Our Seating Unit is a Patented Angle-Iron Frame and Metal stretchers which provides great Comfort and Strength underneath the Seat Deck. This Unit also ensures the frame remains square, and will relieve any unnecessary stress on the Frame Rails. When used in combination with a strong, quality built frame....You can expect many years of Use and Wear! This Seating unit will perform as consistent, if not longer than traditional 8-Way Handtie, and will offer comfortable seating support for people of all weights.**

- ◆ **For our Unique Shaped furniture, we use a High Quality, Heavy Guage steel Sinuous Seat Spring. The manufacturer of this spring has over 6 decades of Experienced manufacturing of Quality Springs & Sinuous wire products. The load factor is built into each spring which helps prevent sagging. Each spring is secured to the frame with Padded, Premium clips specifically designed to reduce noise, support various weights, and offer extreme holding power.**
