

GENERAL FRAME & SEATING INFORMATION

FRAME CONSTRUCTION:

- ◆ *The Kiln-Drying process will remove approximately 93% of the moisture out of the Wood. This reduction in moisture content is important to ensure the Wood does not Warp nor Shrink with the change in Humidity and Temperature. Warping and Shrinking can quickly destabilize the Furniture Frame.*
- ◆ **Our Kiln-Dried Hardwood Frames are constructed with Doweled and Glued Joints secured by using heavy duty Staples and Screws. The Frame is also secured with Corner Blocks placed strategically within the Frame and Screwed into Place for added Strength and Durability. Species: Maple & Oak**

All NC Reupholstery & Handcrafted Furniture Frames are SFI Certified (Sustainable Forestry Initiative), and are also TSCA Title VI Compliant (Toxic Substances Control Act).

We are committed to help protect Human Health and the Environment. We want to do our part in Protecting Species, combatting Climate Change, Reducing Plastic Pollution, Reducing our Landfills, and protecting our Water Supplies.

GENERAL FRAME & SEATING INFORMATION

OTHER SEATING CONSTRUCTION:

- ◆ **For Styles such as Dining Chairs, We use high performance, three dimensional knit Webbing. Our Webbing has a unique structure which provides controlled longitudinal support for Body Weight. This Webbing is Extremely durable under many conditions, and provides consistent performance time and time again!**
